

WOOD NATUR s.r.o.

INTERIOR

CATALOG

2025/26

The image consists of three vertical panels, each displaying a different wood grain texture. The left panel is dark brown with a prominent, wavy grain pattern. The middle panel is light-colored, almost white, with a fine, vertical grain pattern. The right panel is dark, almost black, with a vertical grain pattern. Each panel has a corresponding text label at the bottom.

PRODUCT DESCRIPTION

We bring to your attention our 'column' products for floor and table use, which were made in a combined way: recycled wood - natural ash wood.

Natural stone of various colours such as marble and granite, in combination with stainless and ordinary metal, gives the products a beautiful design.

The wood finishing process such as deep and light brushed (selecting a softer layer of wood that creates a recess in relation to a harder layer) or a smooth surface without brushing makes it possible to use the products in various interiors.

The range also includes products made of original old wood, the structure of which has been 'worked on' by nature for decades or even a hundred years.

The 'columns' are painted with water-based paint in three basic colours: white, black, wenge.
At the request of the customer, we can provide other colours according to the RAL colour table.

We also complete the columns with LED lamps, which makes it possible to illuminate various objects placed on the column at night. Nine colours controlled by a remote control will create a pleasant atmosphere in the room.

At the request of the buyer, we can provide individual sizes of the 'column', RAL colour, breed and colour of stone, both natural and artificial.

Contact us, order and use our products with pleasure. Best wishes.

80x23x23 cm

Pillar, ash lamellas, color wenge, structured wood, cover is natural stone.

100x25x25 cm
